

OLA ACHIEVES ANAB ISO-17025 ACCREDITATION

Posted on May 8, 2022

OLA is the only commercial lab in Midland-Odessa with ANAB ISO-17025 accreditation, providing our customers with confidence that the data they receive from our lab is reliable and correct. ISO-17025 accreditation is a mark of assurance, indicating a laboratory is held to the highest standards of data analysis and accuracy.

This includes determining everything from reference materials to pipettes are calibrated, verified, validated, and traceable back to the ISO-17025 standard. Further, to maintain this accreditation from ANAB, our lab undergoes routine audits as well as technical reviews by a board of independent scientists to certify our data is accurate and our systems are unbiased.
